

TRP

RACE SUPPORT | SERVICE COURSE TECHNICIAN EUROPE

(M/W/D) IN HASSLOCH, GERMANY

We are TEKTRÖ Europe GmbH, a subsidiary of TEKTRÖ/TRP Technology Corporation in Taiwan. Our office is positioned strategically in Haßloch, Germany, directly adjacent to the Palatinate Forest, approximately one hour southwest of Frankfurt. Specializing in the cycling component industry, we cater to a robust European market with many prominent customers and partners.

As part of our growth strategy, we are seeking driven and dedicated individuals to join our Race Support team. Successful candidates will demonstrate a profound understanding of the bicycle industry, coupled with a proven track record of achieving results. A commitment to professionalism, collaboration, and a team-oriented mindset is crucial.

Key responsibilities include fostering relationships with Athletes or Team Managers and contributing to the overall success of the Race-Support program. If you are an individual who values teamwork, professionalism, and has a passion for driving excellence in the cycling industry, we invite you to submit your application. Regardless of whether you are an employee, self-employed or a freelancer. Your role will be integral to our collective success as we navigate challenges and work towards shaping the future of our industry.

RESPONSIBILITIES

Your daily tasks include:

- Represent TRP at UCI World Cup races and share our story, passion and values with the world
- Follow established processes and develop new ones to elevate our race program
- Understand our riders needs and requirements, observe mechanical repairs and service products during race events
- Communication with athletes, team managers, engineers and various in house departments
- Manage all sides of the daily business as a Race support mechanic
- Prepare and managing in house workshops for the TEKTRÖ/ TRP employee's
- Bring performance driven energy and efficiency to every bike and task

REQUIREMENTS

- In depth technical knowledge of bicycle components (Brakes & Drivetrains)
- Mechanical experience with bicycle components
- Experience working in a race environment, multitasking skills, performance driven
- Good communication skills
- Ability to handle high pressure, time sensitive situations
- Multilingual (English, French or Spanish)
- Schedule flexibility
- Ability to work independently and be proactive
- Computer skills (typing, web based application, etc.)
- Bike shop experience is a plus

BENEFITS

- Ability to work around the world following the UCI World Cup circuit
- Learn from our world technicians and expand their capabilities
- Being a part of an international team
- Professional development from a company with international background
- Opportunities to work on your own projects, ideas and improvements
- The chance to work in many exciting projects within the bike industry with focus on racing
- Competitive salary
